- Secured second in the event ‘Race Against Time’ at Cascades ‘2009 which is an all Mumbai School Festival.
- Runner up at the event ‘Terrestrial Tycoons’ at “We Are The World” ‘2008.

Projects

- Worked for my family businesses ‘Bohra Engineering and Trading Corporation’ and ‘Bohra Exports’ and individually designed and implemented the following systems:
 - Designed a complete **Files Management System** which can be operated by multiple operators to manage data using Microsoft® Server 2008. This is used to secure sensitive data from users and make the files accessible according to their department.
 - Started an **Employee Management System** which keeps track of all salary components including absenteeism and bonuses and prints out salary slips of individual employees.
 - Worked on a **Networking Solution** for the head office so that the computers in the office can be accessed globally using the internet over RDP (Remote Desktop Protocol) being of great use in managing multiple office in different locations.
 - Developed database using Microsoft® Access which can give **Customized Annual Reports** of the business and point out business opportunities to the management of the company.
- Other minor projects include Build a Railway Ticketing Management system in C++ language, building a Remote Controlled Car for an intra institute competition, and using the universal Arduino board to make a line follower car.

Computer Proficiency

- Comfortable using all popular OS which include **Windows, Macintosh, and Linux**.
- Comfortable using Office tools like **Word, Excel, PowerPoint, Access**.
- Knowledge in business networking required to connect several computers to the peripheral devices.
- Knowing basics of **C++** and **html**.
- Basic knowledge of accounting software **Tally**.
