

I am applying for this school to get an insight about the recent work going on in the field of biology and learn from the company of some of the reknowned people in this field. I have also wondered how principles from physics and mathematics are applied to biological phenomenon and I believe this would be an excellent opportunity to learn more. Biology interests me and having acquired a good knowledge from my engineering curriculum, this would be a unique opportunity to apply my knowledge. I believe this would be a rewarding experience.
