STATEMENT OF PURPOSE

I am Nakka Rajesh, pursuing M.Tech in Mechanical Engineering (Design). I had completed B.Tech (Mechanical) in JNTU College of engineering Hyderabad.

I am Interested in Teaching (from experience in teaching tuitions during my graduation) but I am unable to go for higher studies like PhD. I came from background where hundreds of students are capable of getting into IIT's or what they wish. Because of lacking in guidance their talent is going into vain. I had started an organization with name "FIRE- For Intensive Rural Education" during B.Tech for helping Rural Students. The joy of helping needy enthusiastic students from last three years encouraging me to expanding it further, Sometimes I feel "can I make social service as a career?" (so that the persons thinking in same way can come together and serve for better INDIA). But my economical background and family conditions are pulling me to do a job.

I am in dilemma whether PhD or Job or Organization. Whether PhD or Industrial experience will help more in Teaching?. Completely I am in chaotic state so I am searching for an experienced person to clear my confusion with his guidance.

Thank you

Nakka Rajesh
